**Use electricity smartly**

It can be this easy for households to save electricity (and costs) during summer

1**Use the cold water tap** rather than using the geyser every time

2**When you leave the room, remember to switch off the lights**

3**Set your swimming pool pump cycle to run twice a day, three hours at a time for optimal energy use.** And avoid running a cycle between 5pm and 9pm to support the power system

4**Set air-conditioners' average temperature in summer at 23°C**

5**Be energy efficient and change your light bulbs to energy efficient lights/LED's**

6**At the end of the day, turn off computers, copiers, printers and fax machines at the switch. Avoid stand-by or sleep mode.**
