

KUNSTEGROT MUSIEK EN KOMEDIE

Thabazimbi – Kom lag saam op Saterdag 8 Februarie by die KunstGrot vir Wynand van Vollenstee en sy skreeusnaakse komedie van *Willie wil Wheelie*. Bring die hele familie saam want dit is 'n kindervriendelike vertoning. Jannie du Toit en Chanie Jonker sal

Willie wil Wheelie.

op 14 Maart op die KunstGrot verhoog wees met *Die eggo van jou oë*, bring die jongelinge en kom luister saam.

Die ego van jou oë.

VACANCY

A VACANCY EXISTS AT RHINO MINE, THABAZIMBI FOR A SITE GEOLOGIST REPORTING TO THE MINE MANAGER WITH A DOTTED LINE TO THE OPERATIONS DIRECTOR.

Purpose of the Role:

To be responsible for ore reserve management at Rhino Andalusite Mine, Thabazimbi as well as managing the mining operations plus contractor.

Scope of job:

To directly have an impact on ore reserves, short- and long-term mine budgets, including capital expenditure projects.

Key Tasks and Responsibilities:

1) Exploration Management

- Plan, organise and oversee all drilling campaigns required to maintain Imerys protocol on life-of-mine reserves at the site.
- Plan and supervise exploration programmes.
- Manage contractors involved in exploration program (including the management of safety at exploration sites).

2) Mining Management

- Assist the mine manager with overseeing of mining contractor on a day to day basis to ensure he/she complies to the agreed plans.
- Develop and follow-up on KPI's with the mining contractor to improve continuously on cost, productivity and safety aspects.
- Support the mine manager by conducting ad-hoc and regular studies to ensure equipment selected by the mining contractor is adequate to the operation.

3) Mine Planning Management

- Develop the yearly and quarterly mine plans in collaboration with the Production Manager to ensure adequate ore is feed to the plant while maximising the LOM of the ore body.
- Assist the Mine Manager with communication of mine plans to the mining contractor and assist in breaking them up into monthly/weekly targets.
- Oversee implementation of mine plans and make sure stockpiling of ore is conducted in an adequate manner.

4) Grade Control Management

- Perform the adequate sampling at the mine and at the plant to check that the correct ore is being feed to the plant.
- Perform mapping and mineralogical studies to develop understanding and geological model of the ore body.
- Develop and manage the system required to ensure the contractor is mining selectively the ore body and is avoiding contamination and dilution.
- Liaise with plant management on a day to day basis to communicate around ore quality/characteristics issues.

6) Environmental Management

- Support the mine manager with overseeing applications, studies, assessment required for the compliance of the mine with environmental regulation (water application, air emission, PAR, liability assessment, EMP updates, S24G, application, water management and sampling, etc.).
- Liaise with Head Office SHE Manager and relevant consultants to stay updated with

regulation requirements.

- Assist the mine manager with overseeing the environmental consultant's work on the mine.

7) Permitting Management

- Oversee all applications, studies, assessment required with regards to prospecting and mining right applications.
- Oversee the consultant's work on the mine with regards to mining and prospecting right application.
- Support the mine manager in performing negotiation and consultation with landowners.

8) Data Management

- Develop and manage the database required for the safe storage and integrity of geology, laboratory and mining data (including samples from drilling campaigns).
- Develop on SURPAC and communicate the plans, sections, models required for the proper management of geology and mining works. Communicate the adequate data to Corporate Geologist for quarterly reconciliations.

9) Budget Management

- Participate in the budget and forecast process with regards to mining tonnages, mining cost, & exploration cost.
- Assist the mine manager with proposal and preparation of CAPEX application.

Other Important Job specifications , qualifications; experience; knowledge, skills and attributes:

- Bachelor of Science Honours Degree, or Bachelor of Technology, in Geology
- Minimum of 2 years experience
- Opencast mining experience will be advantageous
- Geological modelling software experience – SURPAC
- Self starter
- Good communication skills
- Must be competent in SURPAC, block modelling and pit design modules

SPESIFIC ASPECTS:

- Site based position but will be required to travel to other areas in or outside South Africa
 - Code 8 drivers licence essential
- IMERYS is an equal employment opportunity employer and values the diversity of our workforce and the knowledge of our people. Preference will be given to applicants from the designated groups and only qualifying applicants should submit a comprehensive CV to mpumi.nameka@imerys.com by no later than **4 February 2020**. Should you not be contacted within 1 month from the closing date of this vacancy, please consider your application unsuccessful.

Please note due to the nature of this vacancy and the legislative requirements attached to this position we will conduct our search for suitable applicants both internal and external simultaneously.

DOKTER JAMIELA BARNARD VERTEL MEER OOR BOSLUISKOORS EN BOSLUISBYTKOORS

Thabazimbi – Dokter Jamiela Barnard het op Maandag 6 Januarie by die Medivet span aangesluit. Sy het haar twee honde, Zorro en Missy, twee Swiss Shepherd honde saam met haar gebring.

Sy het die merkwaardige honde gered na hul eienaar *target practice* op hulle uitgeoefen het. Intussen het sy hul opgelei om haar te help ander diere rustig te hou, hulle wakker te maak na narkose en selfs om hulle hitte te gee, wanneer hulle dit sou nodig hê.

Na 'n groot hoeveelheid gevalle van bosluiskoores aangemeld is het *Platinum Bushvelder* met haar gaan gesels oor die verskil tussen bosluiskoores en bosluisbytkoores.

“Ek word gereeld deur bekommerde honde eienaars gevra wat die verskil is tussen bosluiskoores en bosluisbytkoores. “ sê Barnard.

Bosluiskoores is 'n bloedparasiet wat in honde se rooibloedselle voorkom. Dit veroorsaak bloedarmoede en vermindering van bloedplaatjies. Die parasiet word oorgedra deur die bruin hond-bosluis wat algemeen hier in die Bosveld voorkom. Wanneer die bosluis 'n hond byt, migreer die parasiet na die rooibloedselle toe. Die rooibloedselle breek en die inhoud lek in die bloedstroom in wat dan later deur die urine uitgeskei word.

Kliniese tekens van die siekte sluit in bleek slymvliese, donker geel tot rooi urine, swakheid en koores. Komplikasies is volop en die siekte kan tot die dood van 'n hond lei. Behandeling moet so gou as moontlik plaasvind en 'n veearts gebruik 'n bloedsmeer van die hond, sowel as meer gevorderde toetse om te help met die diagnose. Honde wat baie siek is, word dadelik op 'n drup gesit en opgeneem in die diere hospitaal

vir verdere behandeling. Indien die diagnose vroeg genoeg gemaak word kan die hond huis toe gaan met tuis behandeling wat deur die veearts voorgeskryf word. Honde met bosluiskoores kan vergelyk word met mense wat malaria opdoen.

Bosluisbytkoores se parasiete word meestal in honde se witbloedselle aangetref. Die siekte kan spontaan genees, maar sommige honde ontwikkel swakheid, koores, 'n neiging om te bloei en nierskade. Dit kan dodelik wees vir sommige honde. Bosluisbytkoores simptome kan dae tot weke vat om kop uit te steek en die meerderheid honde word nie dadelik na die bosluisbyt siek nie. Die bruin hond bosluis, asook die bontbosluis kan die siekte aan honde oordra. 'n Veearts moet deeglike ondersoek doen om die parasiet op te spoor en behandeling te begin. Tuis behandeling kan gedoen word, tensy die hond baie siek is en opgeneem moet word in die dierehospitaal. Behandeling van die siekte vereis dat die hond daagliks medikasie kry en nie 'n dag oorslaan nie. Die behandeling duur 21 dae.

Nie een van die twee siektes kan van hond na mens oorgedra word nie. Mens is wel vatbaar vir soortgelyke siektes wanneer dieselfde tipe bosluis hulle byt. Die twee siektes verskil baie en so ook die diagnose proses en behandeling. Daar is geen enting teen die siektes nie en honde bly lewenslank vatbaar daarvoor, omdat die parasiet, soos die mensgriep virus, dinamies is en konstant aanpas by die omgewing. Voorkoming is die beste geweer teen die siektes en honde moet gereeld behandel word teen bosluise met die gepaste produk wat by die diere klinieke beskikbaar is.

PRAGWONING TE KOOP!

Thabazimbi - Dubbelverdieping woning met vier slaapkamers, studeerkamer, kombuis, spens, drie badkamers, oopplan leefarea, kaggel in die sitkamer, swembad, ekstra gastebadkamer en 'n stoep. Sonpanele, kragopwekker en drie watertens met gruiswater ingesluit - vir slegs R5,530,000.00.

Skakel Marina vd Wateren by 082-550 6649 by JF van Graan & vd Wateren Eiendomme vir meer inligting.
